

## **St. Paul & The Broken Bones – *Sea of Noise* Lyrics**

### **Crumbling Light Posts Pt. 1**

We're just crumbling light, crumbling light  
in a sea of noise  
in a sea of noise  
X3

### **Flow With It (You Got Me Feeling Like)**

is the way that i move with you  
is the way that my body grooves  
can we persuade our hips to lose  
all of the time inside our room

you got me feeling like I can't hold you  
we ain't gonna fight let's just Flow With It  
this feeling I have inside

is it my lips that long for you  
is the hearts that break in two  
can we use all this drugs we use  
just tryin to always confuse it

you got me feeling like I can't hold you  
we ain't gonna fight let's just Flow With It  
this feeling I have inside

you got me feeling like I can't hold you  
we ain't gonna fight let's just Flow With It  
this feeling I have inside

### **Midnight on the Earth**

Na na na na na

Verse 1

I'm going to take a rocket swing all around the milky way  
there ain't no view better than this  
I can feel it now your body taking over me

red eyes green skin make me do things

Prechorus

I'm just trying love you ain't nobody above you

Chorus

Is there pie in the sky  
is it midnight on the earth  
is the sea painted white  
while there's blood in the dirt  
is there pain in the light  
have monsters come to fight  
I can't kill them off no it ain't worth the cost

Na na na na na

Verse 2

Those glowing eyes starting right back at me  
I can't resist the life that you give me  
I can hear you now take me to your galaxy  
we ain't got time to lose control now

pre chorus

Chorus/outro

## **I'll Be Your Woman**

Oh sweet girl how you rescued me  
for the sirens of defeat  
One sweet kiss and you let me go

Why do we do it this way  
I can't bury your pain  
we'll just hold on and stay  
I'll be your woman  
I 'll be your woman  
yes i will

strongest winds come from your mouth  
set my sails down south  
through this haze and storms of doubt

Why do we do it this way  
I can't bury your pain  
we'll just hold on and stay

I'll be your woman  
I 'll be your woman  
yes i will

to ash I am to ash I will always be  
let me lay in strong arms  
can we find peace in that holy sea

Why do we do it this way  
I can't bury your pain  
we'll just hold on and stay  
I'll be your woman  
I'll be your woman  
yes i will

## **All I Ever Wonder**

Velvet fist in the gut while everyone is slingin' mud  
Jesus found his politics but nobody listens  
rent it will rise but our doctors keep us high  
we can't get too low

I know it's all broken but I ain't got to focus  
Is it hell, is it well can anyone even tell

I can't tell what side I am on  
I can't tell what's right or wrong  
we can't ever just sing one song  
love goes hate goes now I am left all alone

Everyone seems to shout but we got lost in the sound  
follow your sister please just try to hold her

I can't seem to focus I know it's all broken  
Is it hell, is it well can anyone even tell  
I can't tell what side I am on  
I can't tell what's right or wrong  
we can't ever just sing one song  
love goes hate goes now I am left all alone

All I ever wondered would we make it through

I can't tell what side I am on  
I can't tell what's right or wrong  
we can't ever just sing one song

love goes hate goes now I am left all alone

## **Sanctify**

What good is a bullet  
with no gun  
what good is a flower  
without no sun  
oh but I want to feel something real  
what good is a light a light  
with no dark  
what good is a king  
without a cross

oh but I want to feel something real

is that river wide  
is that river deep  
let me sanctify  
let me sanctify you baby

Is there a right  
when is all is wrong  
is there partner  
when left all alone

oh but I want to feel something real

is that river wide  
is that river deep  
let me sanctify  
let me sanctify you baby

Oh let me sanctify you  
I want sanctify you

is that river wide  
is that river deep  
let me sanctify you  
let me sanctify you baby

## **Crumbling Light Posts Pt. 2**

We're just crumbling light, crumbling light  
in a sea of noise  
in a sea of noise

X3

## **Waves**

All the barrels they are pointed up to the sky  
bringing all of the rain  
sanctuary we find in all our glowing screens  
and now I can't stay

Let the waves  
let the waves  
oh let them carry me

All the people they are praying but there ain't love no more  
just bullets and hate  
pictures of a world that we never thought we had  
and now I have gone a stray

Let the waves  
let the waves  
oh let them carry me  
X2

I want to go out to the sea

Bama's gone but I hear her  
please hear my pain  
angels fall but they hold me  
when i am afraid  
love is harmless until  
it lets you go  
heaven's gone but  
hell's below

lets it go  
I want let it go

## **Brain Matter**

oooo want to feel somebody

That's my daddy with a gun shooting someone else's son  
is it over yet  
a bullet with intent for the color of his savior  
and he can't forget

what do we do when the fight goes out

I just want to know can we find love in a black hole

oooo want to feel somebody

lovers in distress and they trying to keep their secrets  
but they can't let go  
liquor on his breath and devil on his shoulder  
and his demons flow

what do we do when the fight goes out

I just want to know can we find love in a black hole

oooo want to feel somebody

concrete in his veins and gravel in his soul  
where the citrus grows  
that's my daddy with a gun shooting someone else's son  
is it over yet

What do we do when the fight goes out

I just want to know can we find love in a black hole

## **Burning Rome**

Where'd you go my sweet devotion  
can i find in that sea of those ole gravel highways

you are stronger cause I am weak  
you are wiser cause I seek

I am burning rome  
oh I am burning rome

lord I know that you can hear my same sad songs  
but the numbness that grows in my heart on those ole southern night

You are hurting when i cry  
i am screaming why oh why

am I burning rome  
am i burning rome

there it goes that precious light upon my feet  
now i am carrying down by the stones of that young heartache

I am stronger cause you're weak  
I am wiser cause I seek

oh I am burning rome  
oh I am burning rome

## **Tears In The Diamond**

this room he has full of perfume, blood and tears  
got to figure out now baby  
cause he can't understand

what is he suppose to do with this beast inside  
i hope he finds the lord soon before he loses his mind

cause there's too many tears in that diamond  
too many tears in that diamond  
too many tears in that diamond  
you got to let it let it go

he hasn't learned one thing since that young age of 15  
love don't heal all wounds baby  
but it always hides the truth

cause there's too many tears in that diamond  
too many tears in that diamond  
too many tears in that diamond  
you got to let it let it go  
why can't the lord hear me  
i am not sure he's even there  
there ain't damn thing he could do  
to make him even care

cause there's too many tears in that diamond  
too many tears in that diamond  
too many tears in that diamond  
you got to let it let it go  
let it go let it go

## **Is It Me**

Guns how they smoke behind the dogwood tree  
all the bars are closed right before the county line

oh how that breeze smells like honey from a bee  
is it hell is it home or is it me

Jesus is stuck inside my tv screen  
giving all the answers but never holding me  
heaven is too far away and I can't find no peace  
is it hell is it home or is it me

Oh i feel like a cotton rose hiding down between my toes  
precious light how I seek i can't believe what i see

devils want you take me up with you  
i could use the company and i am sure you could use it too  
fly in your spaceship dance on saturn's rings  
is it hell is it home or is it me

### **Crumbling Light Posts Pt. 3**

We're just crumbling light, crumbling light  
in a sea of noise  
in a sea of noise  
X3
